1. Problem Statement

To design and develop a responsive bakery and cake shop website that displays different bakery products such as cakes, pastries, and cookies. The website should include product images, prices, custom cake designs, seasonal offers, and store contact details. It should have an attractive layout, easy navigation, and visually appealing image galleries to provide a pleasant user experience.

2. HTML and CSS Code

Save the following code as bakery.html and open it in a web browser.

3. Output:

4. Conclusion

The Bakery and Cake Shop Website provides an attractive and user-friendly platform for displaying bakery products, prices, seasonal offers, and custom cake designs. HTML is used to structure the webpage, while CSS adds colors, layouts, image galleries, hover effects, and responsive styling. This project demonstrates the practical use of HTML and CSS to create a professional bakery website.

Yoga and Meditation Website – HTML and CSS Code

1. Problem Statement

To design and develop a responsive Yoga and Meditation Website that provides information about yoga poses, meditation techniques, instructor profiles, class schedules, membership plans, and wellness articles. The website uses calming colors, readable typography, and attractive images to create a peaceful and relaxing user experience.

2. HTML Code with Internal CSS

Save the following code as yoga.html and open it in your browser. The HTML and CSS are included in the same file.

4. Conclusion

The Yoga and Meditation Website provides a peaceful and attractive platform to learn about yoga, meditation, instructors, class schedules, membership plans, and wellness practices. HTML creates the structure, while CSS improves the appearance, layout, and responsiveness. This project demonstrates how HTML and CSS can be used to build a user-friendly wellness website.

14. Healthy Food and Nutrition Website – HTML and CSS

1. Problem Statement

To design and develop a responsive Healthy Food and Nutrition Website that displays nutritious recipes, weekly meal plans, ingredient lists, calorie information, healthy eating tips, and different food categories. The website uses attractive food images, responsive cards, and a clean layout to encourage healthy eating habits.

2. HTML Code with CSS

Save the following code as healthyfood.html and open it in your web browser.

```
<!DOCTYPE html>
